Public Health Service

National Toxicology Program Board of Scientific Counselors; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Toxicology Program Board of Scientific Counselors, U.S. Public Health Service, June 27-28, 1980.

The meeting on June 27 will be held in Room 1331, Switzer Building (formerly HEW South Building), 330 C Street, S.W., Washington, D.C. This meeting will be open to the public from 9 a.m. until adjournment for the purpose of completing external peer review on technical reports of bioassays from the National Cancer Institute (NCI) Carcinogenesis Testing Program. Reviews will be conducted by the Technical Report Review Subcommittee of the Board in conjunction with an *ad hoc* panel of experts. Attendance by the public will be limited to space available.

The meeting on June 28 will be held in Building 31C, Conference Room 10, National Institutes of Health, Bethesda, Maryland. The meeting will be open to the public from 9 a.m. to adjournment for the purpose of discussing and making recommendations on a permanent mechanism for external peer review of National Toxicology Program (NTP) technical reports and for hearing progress reports by the Chemical Nomination and Selection Subcommittee, the Report Review

Subcommittee, and the Automated Data Processing Subcommittee. Attendance by the public will be limited to space available.

The NTP Director, Dr. David P. Rall, P.O. Box 12233, Research Triangle Park, North Carolina 27709, telephone (919) 541-3201, or FTS 629-3201, will furnish summaries of the meeting, rosters of committee members, and substantive program information.

Regarding technical report peer review, reports will be reviewed June 27 on the following chemicals (and routes of administration):

Chemical	Route
2,3,7,8-Tetrachlorodibenzo-p-dioxin	Skin paint
2,3,7,8-Tetrachlorodibenzo-p-dioxin	Gavage
Dibromochloropropane (DBCP)	Inhalation
1,2-Dibromoethane (EDB)	Inhalation
Cytembena	Intraperitoneal
Yellow 6	Dosed feed
Orange 10	Dosed feed
Butylbenzyl phthalate	Dosed feed
Di(2-ethylhexyl)adipate	Dosed feed
Caprolactam	Dosed feed

Dated: May 23, 1980.
 David P. Rall, M.D., Ph.D.,
Director, National Toxicology Program.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

West-Central North Dakota Management Framework Plan; Invitation To Comment

May 19, 1980.

Notice is hereby given that the Dickinson District, Bureau of Land Management (BLM) invites public comments on the land use recommendations contained in the West-Central North Dakota Management Framework Plan (MFP). The comment period extends from June 3, 1980 through July 22, 1980.

Background standards and procedures for MFP preparation and review are contained in Federal Register Notice FR Vol. 44, No. 140 pp. 42584-42652 of July 19, 1979; FR Vol. 44, No. 153, pp. 46386-46401 of August 7, 1979 and FR Vol. 44, No. 233, pp. 69374-69378 of December 3, 1979. The standards for this review are also discussed in a final environmental statement describing the Secretary of Interior's preferred coal program and alternatives, which was released in April, 1979.

The subject area is within the Fort Union Coal Region and covers the following North Dakota counties: Stark, Dunn, Mercer, Oliver, and McLean, as

well as a small portion of Billings County. The area is adjacent to the Little Missouri National Grasslands and the Fort Berthold Indian Reservation.

There are three types of recommendations contained in the plan. They address (1) the BLM-administered surface lands in the Lost Bridge Management Area, most of which are near or adjacent to the Little Missouri River; (2) the scattered, isolated tracts of BLM surface land in the rest of the planning area; and (3) the federal coal and oil and gas under private or state land or under land administered by another federal agency. In terms of the acres involved and the potential economic impact of the recommendations, coal is the most significant federal resource in the West-Central Planning Area.

The recommendations do not constitute final decisions to lease or not lease coal. Those decisions will be made later in the federal coal management process.

Any federal coal identified as acceptable for further consideration for leasing may be included in the Fort Union Coal Region activity plan and environmental impact statement. The Secretary of Interior has chosen December 1982 as a preliminary target date for leasing federal coal in this region.

The coal recommendations were developed after applying the Secretary's unsuitability criteria and after considering surface owner views and surface resource trade-offs.

The recommendations packet—containing narratives, tables, and maps—will be mailed to all known interested individuals; affected surface owners; industry and concerned citizen groups; and local, state, and federal government agencies on or about June 1, 1980.

The maps in the packet show the federal coal deposits in the planning area with a high to moderate potential for development, the areas within these deposits covered by some type of coal lease, and the areas where surface owners over federal coal (whose land is not covered by a private surface lease for coal mining) are opposed to federal coal leasing. Other maps depict the results of applying the unsuitability criteria as required by Federal Regulations [43 CFR 3461.3-1(a)(2)].

Open-house meetings will be held June 18-19 to give interested people the opportunity to discuss the plan recommendations with members of the BLM Dickinson District Office staff. The schedule for the meetings is as follows: June 18—City Hall, Dunn Center, ND; June 17—City Auditorium, Garrison, ND;
